Social policy affects everyone and is everyone's business. Even if you do not receive welfare payments, directly or indirectly you benefit from government services and funding. Yet how are policies and programs actually developed? Can social policy help us create a more just society? This book

offers an introduction to the theory and practice of social policy making in Australia. Using detailed case studies, it covers:

- * the ideas and values which inform the social policy process
- * how different groups can influence policy making
- * how social policy making takes place in social and political organisations
- * the political nature of policy making

Making Social Policy in Australia is the most up to date introduction to Australian social policy currently available, and is essential reading for students and practitioners in human and community service work and government. Tony Dalton, Mary Draper and John Wiseman lecture in Social Work and Social Sciences at Rmit, Melbourne; Wendy Weeks lectures in Social Work and Social Policy at the University of Melbourne and is author (in collaboration) of Women Working Together:

This book explores the tensions between the competing social rights and social control functions of the modern Australian welfare state. By critically examining the history and rhetoric of the Australian welfare state from 1972 to the present day, and using the author's long-standing research on the Australian Council of Social Service and other welfare advocacy groups, it analyses the transformation from rights-based to conditional welfare. The Labor Party Government from 1972-75 is identified as the only clear cut example of Australia positively using welfare payments and services as

an instrument to promote greater social equity, inclusion and participation. Since the mid-1970s, the Australian welfare state has gradually retreated from the social rights agenda conceived by the Whitlam Government. Australia has followed other Anglo-Saxon countries in adopting increasingly conditional and paternalistic measures that undermine the protection of social citizenship outside the labour market. In contrast, this text makes the case for an alternative participatory and decentralized welfare state model that would prioritize social care by empowering and supporting welfare service users at a local community level. This book will be of interest to academics, students and policy-makers working within social policy, social work and political sociology.

The provision of social services in Australia has changed dramatically in recent decades, raising a range of important questions about financial and democratic accountability: 'who benefits', 'who suffers' and 'who decides'. This book explores these developments through rich case studies of a diverse set of social policy domains. The case studies demonstrate a range of effects of marketisation, including the impact on the experience of consumer engagement with social service systems, on the distribution of social advantage and disadvantage, and on the democratic steering of social policy.

Around the world, democracies have seen a decline in social and political trust. Australian Social Attitudes IV: The Age of Insecurity is an in-depth look at the economic and geopolitical uncertainty that pervades Australian public discourse. In the decade following the Howard administration, Australian politics has been defined by growing uncertainty, instability, and the emergence of popular disaffection with the political class, similar to what has been seen in the United States and Britain. Featuring contributions from Australia's leading social scientists, this book explores the connection between insecurities and disaffection, and the ways in which they have manifested — in populist voting patterns, suspicions about

climate science, and hostilities to immigration. A fascinating insight into what Australians think about contemporary political and social issues, this book is designed to present the public, media, and policymakers with up-to-date analysis of public opinion about important topics confronting Australian politics and society.

The first book to examine social policy in the post-welfare state. It looks critically at the idea of the welfare state, analysing the changing concept of welfare and arguing that the welfare state no longer exists in Australia. The book is written in an accessible and student-friendly style.

- Paul Kelly, International Editor, The Australian 'This innovative and important volume, unique in the policy literature, provides ideas and case studies of interest to everyone who cares about the quality of Australian public policy. It will be an indispensable guide to past choices, and its lessons should help shape future Australian social policy decisions.' - Dr Glyn Davis, co-author of The Australian Policy Handbook How are social policies conceived, developed and put into practice? Based on four case studies of social policy reforms in which the author was a major player (the Child Support Scheme, AUSTUDY, the Higher Education Contribution scheme (HECS) and long-term employment

policies presented as 'Working Nation') Social Policy, Public Policy provides insights into what is often otherwise seen as a 'black box' on how policy advice occurs. Meredith Edwards' personal experience, revealed in extracts from her journal, provides a picture of what social policy participants actually do, something on which too little has been written. Questions addressed in the book include: How was the policy problem identified and articulated and by whom? What were the key ingredients in policy analysis? When did consultation occur and in what form? How was the policy decision arrived at? What were the events between decision and implementation? And what evaluation processes occurred? Social Policy, Public Policy is essential reading for all students of public policy and policy advisers.
