In Exodus God is said to have borne Israel on eagles' wings: here the wings are given to the woman. The strength of the earlier dispensation is a strength often used for, rather than in, the people of God; the strength of the latter is a strength in them: "They mount up with wings as eagles" (Isaiah 40:31). The place is not a chance spot: it is prepared of God; it is in the wilderness, but still it is the place God prepared for her.

The first was like a lion, and had eagle 's wings: I beheld till the wings thereof were plucked, and it was lifted up from the earth, and made stand upon the feet as a man, and a man's heart was given to it.

Stories have traditionally been classified as epics, myths, sagas, legends, folk tales, fairy tales, parables or fables. However, the definitions of the terms have a tendency to overlap, making it difficult to classify and categorize material. For this reason, a case can be made for the introduction of a new genre, termed the shamanic story - a story that has either been based on or inspired by a shamanic journey (a numinous experience in non-ordinary reality) or one that contains a number of the elements typical of such a journey. Other characteristics include the way in which the stories all tend to contain embedded texts (often the account of the shamanic journey itself), how the number of actors is clearly limited as one would expect in subjective accounts of what can be regarded as inner journeys, and how the stories tend to be used for healing purposes. Within this new genre, it is proposed that there exists a sub-genre – shamanic stories that deal specifically with divination, and examples are presented and analysed to support this hypothesis. By means of textual analysis it can be shown they all share certain attributes in common, the identification of which forms the conclusion of the work.

Before the massive environmental change wrought by the European colonization of the South, hundreds of species of birds filled the region's flyways in immeasurable numbers. Before disease, war, and displacement altered the South's earliest human landscape, Native Americans hunted and ate birds and made tools and weapons from their beaks, bones, and talons. More significant to Shepard Krech III, Indians adorned themselves with feathers, invoked avian powers in ceremonies and dances, and incorporated bird imagery on pottery, carvings, and jewelry. Krech, a renowned authority on Native American interactions with nature, reveals as never before the omnipresence of birds in Native American life. From the time of the earliest known renderings of winged creatures in stone and earthworks through the nineteenth century, when Native southerners took part in decimating bird species with highly valued, fashionable plumage, Spirits of the Air examines the complex and changeable influences of birds on the Native American worldview. We learn of birds for which places and people were named; birds common in iconography and oral traditions; birds important in ritual and healing; and birds feared for their links to witches and other malevolent forces. Still other birds had no meaning for Native Americans. Krech shows us these invisible animals too, enriching our understanding of both the Indian-bird dynamic and the incredible diversity of winged life once found in the South. A crowning work drawing on Krech's distinguished career in anthropology and natural history, Spirits of the Air recovers vanished worlds and shows us our own anew.

Wardle's commentary will stand for decades to come as a worthy modern counterpart and complement to Pease's grand opus - J. Linderski, Scholia Reviews

In the two Books of De divinatione Cicero considers beliefs concerning fate and the possibility of prediction: in the first book he puts the (principally Stoic) case for them in the mouth of his brother Quintus; in the second, speaking in his own person, he argues against them. In this new translation of, and commentary on, Book One--the first in English for over 80 years--David Wardle guides the reader through the course of Cicero's argument, giving particular attention to the traditional Roman and the philosophical conception of divination.

There is a common but often unspoken arrogance on the part of outside observers that folk science and traditional knowledgeñthe type developed by Native communities and tribal groupsñis inferior to the ôformal scienceô practiced by Westerners. In this lucidly written and humanistic account of the Oodham tribes of Arizona and Northwest Mexico, ethnobiologist Amadeo M. Rea exposes the limitations of this assumption by exploring the rich ornithology that these tribes have generated about the birds that are native to their region. He shows how these peoples’ observational knowledge provides insights into the behaviors, mating habits, migratory patterns, and distribution of local bird species, and he uncovers the various ways that this knowledge is incorporated into the communities’ traditions and esoteric belief systems. Drawing on more than four decades of field and textual research along with hundreds of interviews with tribe members, Rea identifies how birds are incorporated, both symbolically and practically, into Piman legends, songs, art, religion, and ceremonies. Through highly detailed descriptions and accounts loaded with Native voice, this book is the definitive study of folk ornithology. It also provides valuable data for scholars of linguistics and North American Native studies, and it makes a significant contribution to our understanding of how humans make sense of their world. It will be of interest to historians of science, anthropologists, and scholars of indigenous cultures and folk taxonomy.
