VMT IMS E | Mould and segment measurement

Measurements, calculations and an analysis of the results can be carried out within about 20 to 40 minutes. Evaluations can be adapted for specific customers and the results provided in any format required. Range of services. Purchase or rental with corresponding training; Measurement service by VMT engineers on site (equipment included) Options

Laser-Tracker Industry Measuring System: VMT GmbH

RCMS is a hardware and software components-based system solution to measure ring convergences and is specially optimised for tunnelling projects with segmental lining. Ring convergences are deformations resulting from environmental pressures (rock pressure, annular gap injection) after the installation of a ring.
