Telecommunication

Telecommunications transmission has changed radically in the last 5 years, with the booming popularity of mobile cellular systems, microwave radios, fiber optics, and the increasing transmission of data. This book is thus an engineer's design guide to these systems, showing how they work, how

Acces PDF

Telecommunication

to design them, and how to integrate them into more conventional networks.

Although the original telecommunications fibre optic systems would have used large lasers, today a variety of semiconductor devices can be used. The most commonly used devices are light emitting diodes, LEDs, and
